Check Point and Citrix: Securing the SD-WAN Edge with Multi-layered Security

The coronavirus has challenged enterprise to quickly enable their employees to work productively from home. Enterprises are turning away from traditional WAN architectures and adopting SD-WAN to provide better support for cloud SaaS applications.

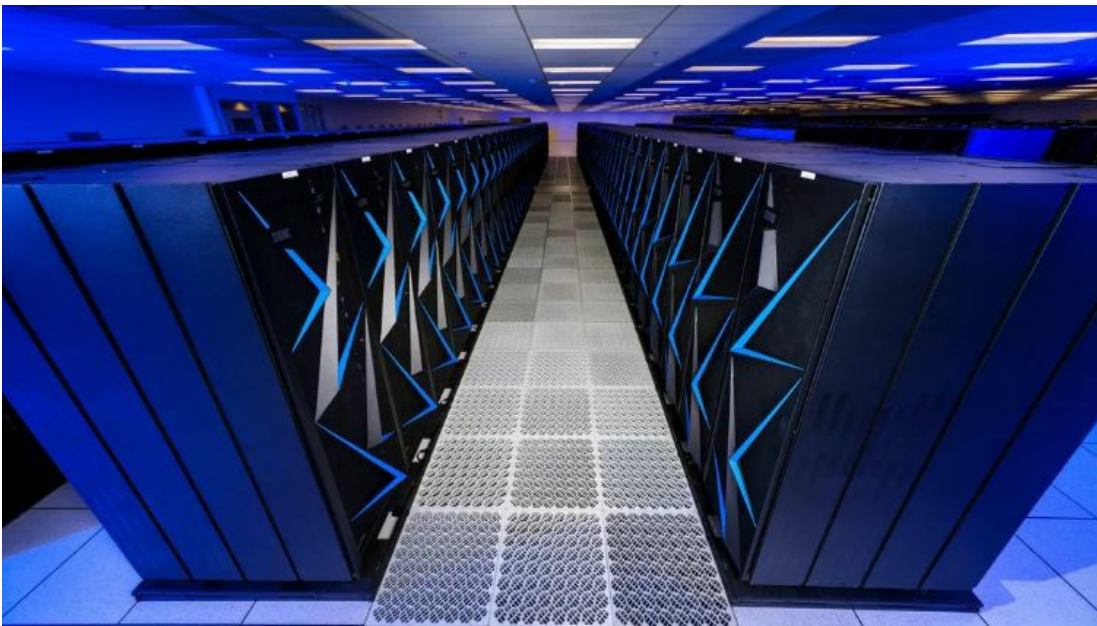

[READ MORE>](#)

When the full impact of the coronavirus epidemic became apparent, businesses and schools were forced to take swift action. They restricted physical access to facilities and provided emergency network connectivity.
