3 Ways Technology and IoT Will

Technology was one of the few industries that fared well in 2020. With the shift to remote work and the need to stay home due to COVID-19, people relied on technology for both business and social connection. Everything from virtual corporate conferences and Zoom happy hours to online classrooms and live-streamed workouts suddenly became the norm....

CES 2021 Showed Us How Robots Can Ease Our Pandemic Woes

The first all-digital CES has come and gone, and it was a very different event than the ones we've experienced in the past. But it wasn't just the format that was different; the tech was different too.

There was a discernible shift in some of the products being shown off by exhibitors--a move toward tech designed to....
